## ENERGY, POWER & INFRASTRUCTURE EXPERTISE

- Advisory services to an independent oil & gas producer with \$100 million in RBL loans. Company was experiencing compressed margins and cash flow issues as a result of reduced commodity prices. Key responsibilities included cost reductions, vendor relations, cash management and financial modeling.
- Financial advisor to the lenders of an E&P company owning oil and gas assets in Texas and Alabama. Key responsibilities included evaluating the business and developing various restructuring options to present lenders with a range of recovery options. Work resulted in successful sale of all operated and non-operated assets.
- Ran assignment for the Benefit of Creditors process for a hotel booking company. Collected, recovered and maximized company assets to ensure maximum creditor recovery.
- Multiple cases and advisory roles involving diligence efforts, thirteen-week cash flow construction, operational model construction and redesign, business plan and strategic roadmap construction for companies in a range of industries (i.e. eCommerce, Construction, Cloud Computing, Retail, Manufacturing, Healthcare, Food & Beverage).
