HEALTHCARE EXPERTISE

- Interim President and Chief Financial Officer to a dental laboratory manufacturing company where he rebuilt management and finance teams and significantly reduced operating expenses through a series of strategic initiatives despite a volatile operating environment before selling the assets of the business through a UCC Article 9 sale.
- Chief Restructuring Officer to a clinical-stage biopharmaceutical company which filed for Chapter 11 as a lawsuit with a former co-development partner was coming to a head. SCP led a settlement negotiation to resolve the litigation and is in the process of effectuating an orderly wind down of the business, which has already resulted in full repayment to the pre and post-petition lenders.
- Financial advisor to a beauty and personal care contract manufacturer where he developed a series of financial planning tools to identify opportunities for improved operational efficiency and to facilitate negotiations with the senior lender.
